Run turbo:install:redis to switch on Redis and use it in development for turbo streams
    apply /root/.rbenv/versions/3.1.2/lib/ruby/gems/3.1.0/gems/stimulus-rails-1.3.3/lib/install/stimulus_with_importmap.rb
Create controllers directory
    create app/javascript/controllers
    create app/javascript/controllers/index.js
    create app/javascript/controllers/application.js
    create app/javascript/controllers/hello_controller.js
Import Stimulus controllers
    append app/javascript/application.js
Pin Stimulus
Appending: pin "@hotwired/stimulus", to: "stimulus.min.js"
    append config/importmap.rb
Appending: pin "@hotwired/stimulus-loading", to: "stimulus-loading.js"
    append config/importmap.rb
Pin all controllers
Appending: pin_all_from "app/javascript/controllers", under: "controllers"
    append config/importmap.rb
    run bundle install

Don't run Bundler as root. Bundler can ask for sudo if it is needed, and installing your bundle as root will break this application for all non-root users on this machine.
